

Awards on year closing for Walvoil, between green and know-how

Posted 20 January 2022

Walvoil closed the 2021 with three important awards, such as the **BAQ2021 label for Quality Alternation** assigned by the Italian **Confindustria**, for the school-job alternation programs offered by the company.

Walvoil has always been committed to building and maintaining virtuous **partnerships with schools, universities and training institutions**

in the territories where it is located: by opening the doors of its plants to show students and schoolchildren its business reality and **make its know-how available**, through a constant dialogue in the design phase of educational programmes, providing materials for school laboratories or collaborating in other activities for training purposes.

In addition, the company won the **JCB Suppliers Award**, assigned during the JCB Suppliers Conference held last 15th December 2021 in Delhi, for quick and comprehensive **development of new products** and subsequent rapid ramp-up of production, in the New product introduction programme category. Over the last few years, Walvoil has developed many new products for JCB, one of the three main worldwide **manufacturers of construction machinery**, for various extremely challenging applications.

Finally, the company has also received the prestigious **Kubota Green Award** on November 18th, established a few years ago by the company with the aim of recognizing and rewarding the virtuous behavior of its suppliers in terms of **environmental sustainability**, raising awareness among its partner companies. The Kubota Group is committed to supporting the harmonious development of our planet and mankind – with products that contribute to **abundant food production, good quality water supply and restoration of water resources** – as well as the creation of a comfortable living environment through its high-quality products, technologies and services.

Walvoil has gained the 2021 recognition thanks to several projects aimed at **transforming its activities and locations in a sustainable way**. Specific projects which are the result of a global vision caring for the present and the future of the people who work in the group and of the planet.
